Problems and Solution

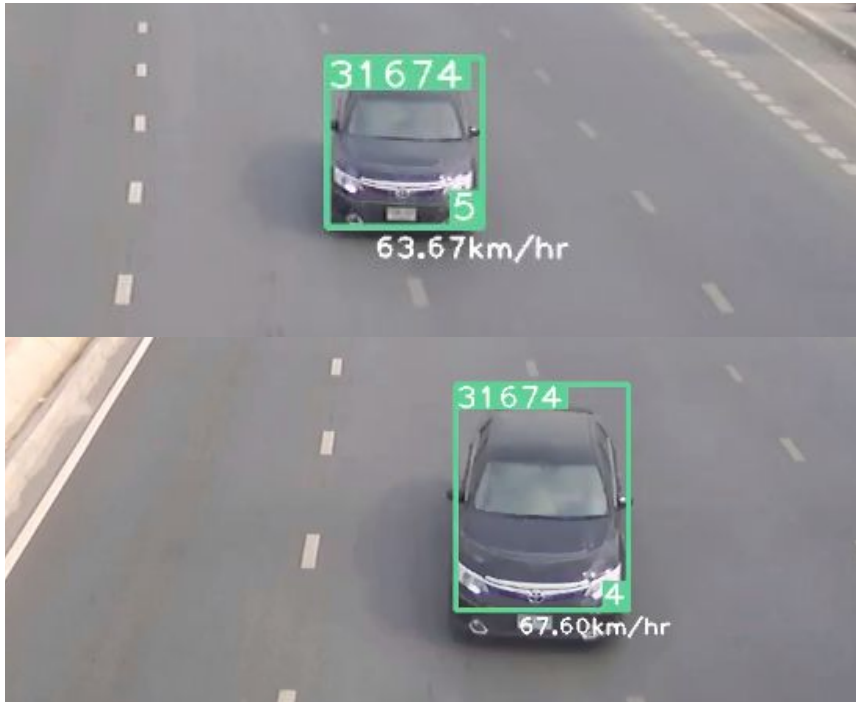

Lane - Out of Lane

Solution

Lane + ROI

Lane - Number of Cars

Solution

Addition / Subtraction

Norfair - Small Bounding Box

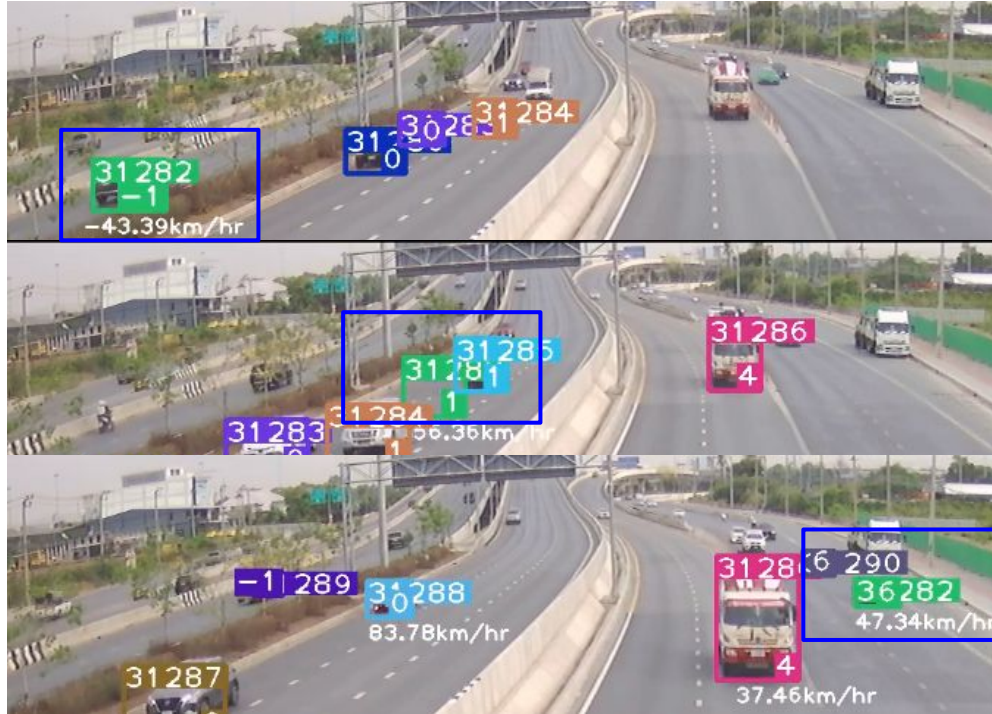

Solution

Norfair - Ignore small bounding boxes

Small by volume:

$$|x_2 - x_1| * |y_2 - y_1| < \text{threshold}$$

Norfair - Max distance between points

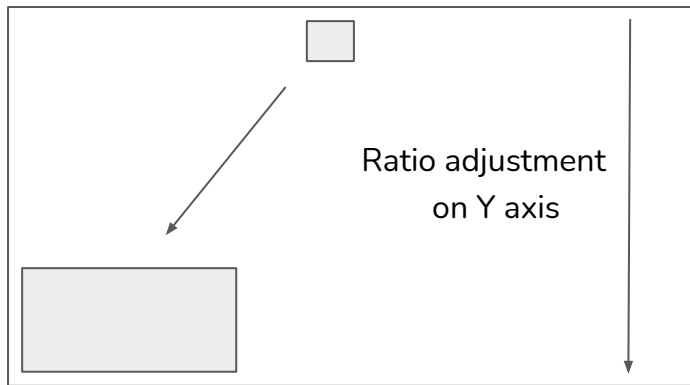

Solution

Norfair adjustment

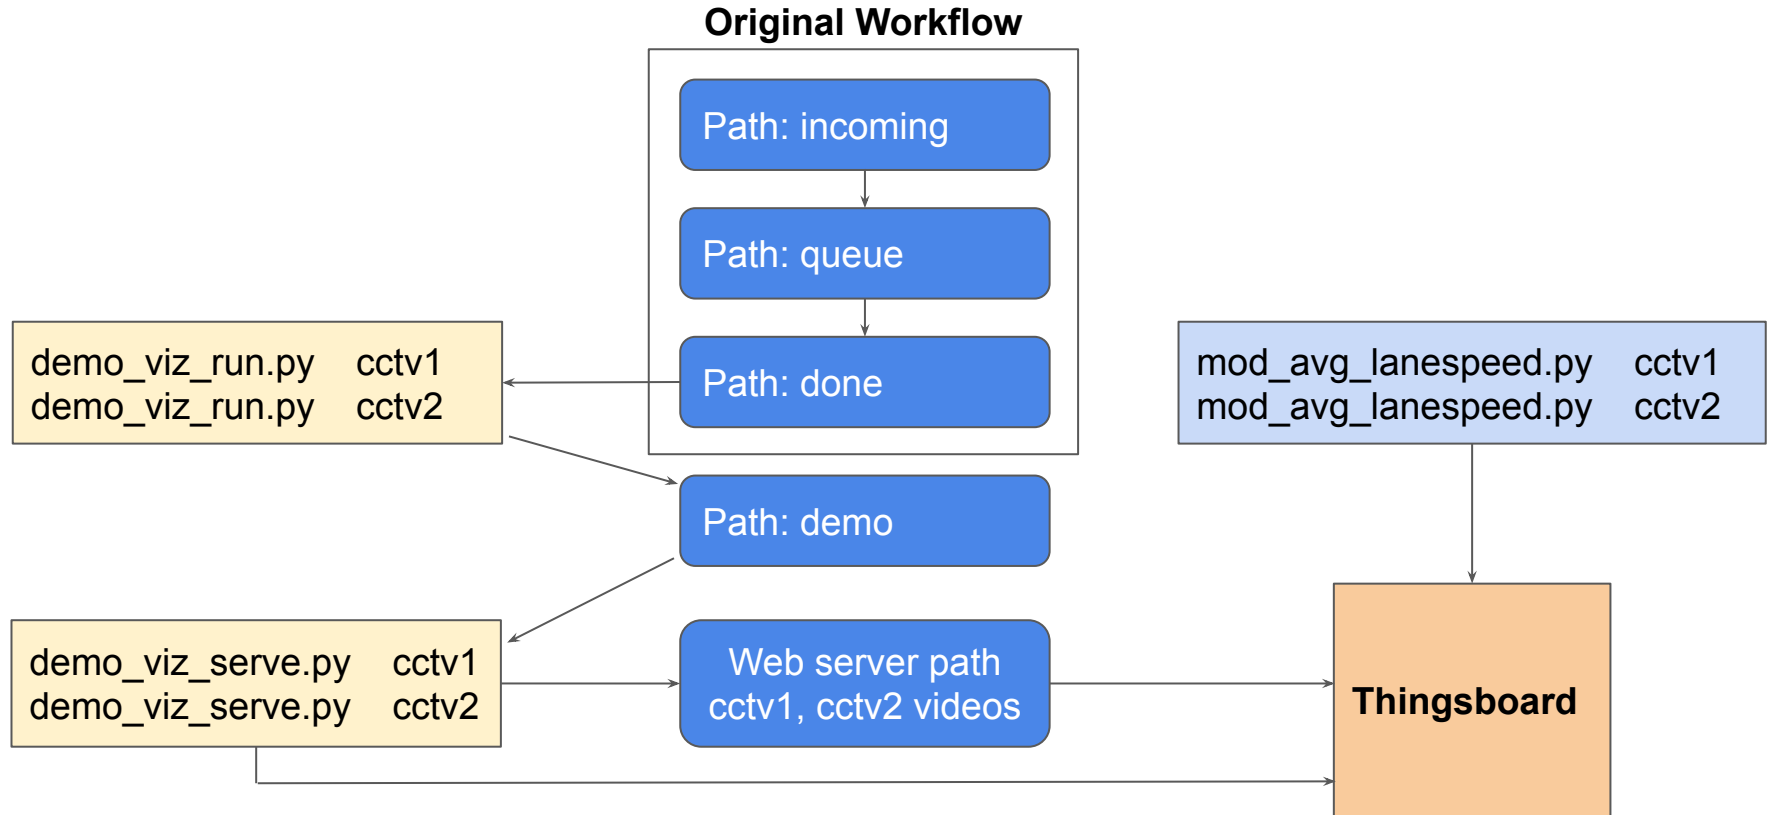

- Acceleration-enabled Kalman-Filter
- Suitable Max distance between points
- Perspective correction
 - Y-axis distance ratio
 - Perspective lib

Norfair: Custom distance function

- Ignore small bounding box
- Ignore Top 10%
- Y-axis distance ratio
